

VIVIANAHIL PHILIP ILANGO

Corcoran, MN | 763-843-5663 | Vivianahil2004@gmail.com | [linkedin.com/in/vivianahillxvi](https://www.linkedin.com/in/vivianahillxvi) | <https://portfolio-eta-sage-18.vercel.app/>

Computer Science student with hands-on experience building AI/RAG systems, full-stack web applications, and data platforms across internships and team-led projects — with a track record of shipping measurable improvements to reliability, cost, and usability.

EDUCATION

Minnesota State University, Mankato — B.S. Computer Science, Math Minor

Expected Spring 2027

GPA: 3.5 | Licensed Life Insurance Producer, State of Minnesota (Since August 2022)

TECHNICAL EXPERIENCE

AI Engineer Intern — Bee Aura Tech

May 2026 – Aug 2026

Remote

- Diagnosed recurring PostgreSQL connection timeouts that were causing widespread ingestion failures, then redesigned the RAG ingestion pipeline to chunk data before opening the database connection and close it immediately after — raising the ingestion success rate from 50% to 95%+.
- Deployed a local Qwen 7B model to handle OCR and visual data processing, enabling image-based information to be extracted directly into the RAG pipeline without relying on third-party vision APIs.
- Worked independently in a remote environment to debug production data flows end-to-end, from database connection handling through to retrieval quality.

Tech: Python, PostgreSQL, RAG, LLMs (Qwen 7B), OCR

Team Lead & System Architect — DAAGS (AI-Driven Synthetic Data Platform)

Jan 2026 – May 2026

Mankato, MN | University Team Project

- Architected and built an AI-assisted synthetic retail data platform that generates realistic employee, payroll, transaction, and supply-chain datasets at 90%+ lower cost than raw LLM generation.
- Designed the relational database schemas underlying the platform, ensuring generated data stayed internally consistent across interlinked business domains.
- Led a 4-person engineering team as system architect, setting technical direction and integrating AI-driven configuration and generation controls across the platform.

Tech: Python, Relational Databases, LLM APIs, System Design

Full-Stack Developer — Teach Track (Educational HLP Platform)

Aug 2025 – Dec 2025

Mankato, MN | University Team Project

- Built core features of an educational platform designed to help special-education teachers implement High-Leverage Practices (HLPs) in the classroom.
- Led application testing across the development lifecycle, identifying and resolving critical issues before release.
- Containerized the full application with Docker, cutting environment setup time and eliminating a class of recurring configuration errors for the rest of the team.

Tech: Full-Stack Web Development, Docker, Application Testing

Frontend Lead — Wizard Board (Soccer Recruiting Analytics Platform)

Jan 2025 – May 2025

Mankato, MN | University Team Project

- Led frontend development for a soccer recruiting analytics platform used to streamline athlete evaluation and coaching workflows.
- Translated stakeholder requirements from coaches and recruiters directly into React interfaces, improving usability and supporting faster recruiting decisions.

Tech: React, JavaScript, HTML/CSS, UI/UX

Backend & Systems Developer — Software Engineering Intern, Chain-Sys

Jun 2024 – Aug 2024

Remote

- Built a document conversion system that transformed DOCX, XLSX, and HTML files into standardized PDFs while preserving original formatting.
- Engineered validation and error-handling logic and optimized batch processing, making the conversion workflow reliable at scale and reducing dependency on third-party conversion tools.

Tech: Python, Document Processing, Batch Systems

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML/CSS

Frameworks & Tools: React, Django, Docker, Git, PostgreSQL

Concepts: RAG & LLM Integration, Data Pipeline Design, Relational Databases, Frontend Development, Containerization, Agile Collaboration, System Architecture

ADDITIONAL EXPERIENCE

Teacher (Part Time) — Little Newtons Daycare

Jul 2025 – June 2026

Supervised and taught children ages 2–6, creating a safe learning environment while supporting early childhood development and educational activities.

Kitchen Crew Member (Part Time) — Raising Cane's

Jun 2024 – May 2025

Prepared and assembled customer orders in a high-volume kitchen environment, consistently meeting strict service-time expectations and maintaining order accuracy.

SELECTED ACHIEVEMENTS

Dean's List, Minnesota State University, Mankato (Fall 2022, Fall 2023, Spring 2026) | Dean's Honor List, Minneapolis Community & Technical College (Summer 2023) | Passed the State of Minnesota Life Insurance Standard Exam (Summer 2022)
